

PROGRAM ENROLLMENT FORM

Please indicate which program you are applying for:

- ☐ Net Zero Challenge (ENERGY STAR 3.1 is a prerequisite)
- ☐ ENERGY STAR 3.1
- ☐ Drive to ENERGY STAR Code Plus Initiative (exceeds current code, but does not meet ENERGY STAR certification)

BUILDER INFORMATION

Company Name: _____ Contact Name: _____

Address: _____ City: _____ State: _____ ZIP: _____

Phone: _____ Email: _____ Federal Tax ID: _____

HOMEOWNER INFORMATION (IF KNOWN)

☐ Check if homeowner contact information is the same as builder above.

Name: _____

Mailing Address: _____ City: _____ State: _____ ZIP: _____

Telephone Number: _____ Email: _____

HVAC CONTRACTOR

Company Name: _____ Contact Name: _____

Address: _____ City: _____ State: _____ ZIP: _____

Telephone Number: _____ Email: _____

PROJECT INFORMATION

Development/Subdivision Name and Town (if applicable): _____

Project/Site Manager: (Name) _____ Phone: _____

Site Manager Email: _____ Utility Partner Account Number: _____

Property Address: _____

The property being enrolled is (check one): ☐ New ☐ A complete gut rehab of an existing building

☐ A single family home ☐ A multifamily property (5+ units) Number of units: _____ Stories: _____

Estimated Square Footage of Conditioned Living Area: _____ Home Energy Rater (if known): _____

Construction Start Date: _____ Estimated Completion Date: _____

INCENTIVE RECIPIENT INFORMATION

The incentive is typically awarded to the individual responsible for making the decision to implement and fund the higher building performance standard for the project. Please check one: ☐ Builder ☐ Homeowner

Incentive Check Payee: _____

Signature of Account Holder (if incentive will be sent to a third party): _____

PROGRAM FUNDING

Funding for this program is limited and subject to change without notice. Project funding is approved on a first-come, first-serve basis. By signing, you state that you understand the ENERGY STAR for Homes Version 3.1 guidelines and understand these rules as they apply to your project, potentially qualifying for an incentive. The NHsaves® utility partner must receive a signed copy of this application before the start of construction. Funding is contingent upon utility partner approval. The program covers third-party Energy Rating fees upon successful completion and full compliance with program requirements. This agreement is contingent upon continued approval and authorization by the commission to recover said amounts from the System Benefits Charge.

 _____ Date _____ Utility Partner Signature _____ Date _____

Print Name _____

Any incentive associated with this application is valid through December 31, 2026.

BUILDING INFORMATION

Please fill as much of the following information as known and submit with a copy of your building plans.
If information is not known, please leave blank.

SECTION I: INSULATION SPECIFICATIONS

INSULATION LOCATION	INSULATION R-VALUE	INSULATION TYPE
Insulation Type		
Sloped/Cathedral Ceiling

PROGRAM DESCRIPTIONS

DRIVE TO NET ZERO CHALLENGE	Homes entering this challenge must meet the ENERGY STAR Homes 3.1 certification requirements and have a renewable energy system installed, such as solar photovoltaics, a small wind turbine or a micro-hydro turbine. Participants compete for a cash incentive to design and build super high-efficiency, zero-net-energy homes.
ENERGY STAR 3.1	Designed for homes being built to exceed 2012 International Energy Conservation Code (IECC). Efficiency targets are increased - including lower infiltration values, better windows and doors, more efficient HVAC equipment including the air handler and ducts in conditioned space, mechanical ventilation, and more efficient lighting. These more efficient features are used to determine the ENERGY STAR Home Energy Rating (HERS) index target. Complete ENERGY STAR Program Requirements can be found at: https://www.energystar.gov/partner-resources/residential_new/program_reqs?s=mega
Drive to ENERGY STAR (Code Plus Initiative)	This is the entry point into efficient building practices for builders/homeowners who are constructing energy-efficient homes that exceed code but do not meet ENERGY STAR 3.1 certification HVAC requirements. Tried-and-true building practices are followed, along with independent inspections and testing from third-party certified HERS professionals. The HERS rater will work closely with you and the builder throughout the construction process to help determine the necessary energy-saving equipment and construction techniques.

PROGRAM REQUIREMENTS

- An approved enrollment form must be submitted and approved by your NHSaves utility partner prior to construction.
- Utility service must be provided by one of the NHSaves utility partners (Eversource, Liberty, New Hampshire Electric Co-Op or Unitil).
- Builder/homeowner agrees to coordinate inspections with assigned HERS rater.
- Participants agree to submit all required builder and HVAC documents to their HERS rater within four weeks of the final inspection. If not submitted, the incentive is forfeited.
- Construction must be complete* by December 31, 2026 to be eligible for receive incentives. Applicants with homes completed after December 31, 2026 will be required to sign an updated agreement. The availability of rebates and services are subject to regulatory funding and program approvals.
- Customers participating in the ENERGY STAR Homes program may not also participate in the prescriptive programs for HVAC, domestic hot water, and appliances.

*Complete - Dwelling means the home is in move-in condition, all mechanical equipment is operating, the HERS testing is complete and all required builder and HVAC documentation has been submitted to the HERS rater.

ADDITIONAL ENERGY STAR BONUS REQUIREMENTS

- The builder must complete a no-cost online ENERGY STAR Orientation Training and register as an ENERGY STAR Builder Partner Version 3.1.
- The HVAC contractor must be an EPA-recognized, credentialed HVAC contractor.
- Homes must meet ENERGY STAR program requirements to qualify for the label and financial bonus.
- ENERGY STAR Version 3.1 can apply to single family, multifamily (5+ units), or townhouse-style construction (three stories or fewer in height) or four stories, provided each residential unit has its own heating, cooling, and hot water systems.
